Do not disturb-Make up the room

The guest presses a button if he/she wishes not to be disturbed. No need to have the Do not disturb paper signs.

There are two types for this solution. The standalone simply notifies the maid through an indicator lamp outside the room. The advanced version includes a card key reader to unlock the door. Included also is a bell button.

Access control

DND-MUR indicator . Installation on a standard BS square metal box.

A solution adaptable to your needs:

1. Stand alone equipment (only wiring accessories). The most cost effective solution.
2. Basic room management system. Automation inside the room; wired or wireless.
3. Room management system. Integrated with the KNX for the building infrastructure.
4. Integrated room management system. Required BacNet (over IP) for the building infrastructure.

- software for the supervision of hotel room status and for basic management of it (e.g. presence of guest, measured temperature, set point temperature modification, key card condition, alarms)
- It includes also the programming of badges for access control function (related to DND-MUR reader)
